Hey Brenda,
Sounds great! Tomorrow after lunch?
Melody

Subject: Map for San Mateo

Hi Melody,

I am starting work on the HRS package for San Mateo and would like to have a couple of base maps for discussion- I was hoping we could start with Mark Purcell's map of the alluvium water- and add all of the mines-differentiating between wet and dry mines- as well as all public and private wells, highlighting those wells that have been sampled- and those above MCL's- also we need to show land use ownership (the old checkerboard) It might get busy quick-so it could be several maps-if needed- but I am hoping to have one big map that we can start with. I will be in the office tomorrow- and can come by - let me know when is good for you.
